Comment:

Location is within a fallow cropfield. A follow-up inspection will need to be conducted, and a vegetation quadrat survey performed, once crop/vegetation has established in order to determine compliance with COGCC 1000 series reclamation requirements.

However, it does not appear as though location would meet reclamation standards, as the area of the well does not appear to have achieved uniform vegetative establishment during the previous planting/harvest. An area approximately 35' x 10' remains bare with little evidence of crop establishment. Compaction issues may exist. See attached photo document.

Utility lines and poles travels south from the facility north of the well, and ends at the Tuttle Walker #1. Inspector contacted Impetro Resources LLC and confirmed that the lines travel underground at this point and provides power to the Walker* Ruth #1.	trujilloam	06/11/2019
Location ID for the well appears to also include the battery/pit facility to the north. Facility under the operation of Impetro Resources LLC	trujilloam	06/11/2019
