INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A subsurface assessment was conducted to determine if petroleum hydrocarbon impacts to the subsurface media existed from a former earthen pit at the Brattain-63N66W #12NENW location. The Site Map depicting the former earthen pit location is attached as Figure 1.

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Soil samples were collected from the assessment soil borings for laboratory analysis of TPH, BTEX, pH, EC, and total metals. The soil samples were in full compliance with COGCC Table 910-1 allowable levels with the exception of total arsenic; however, total arsenic results were less than the United States Geological Survey maximum background level for this soil type.

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.
