**RE: Water Well Sampling**

Dear Ms. Warberg:

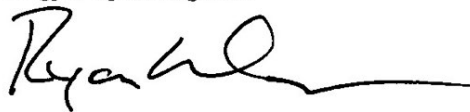

This is a follow-up to the phone discussion we had last month pertaining to the water well you own located on the SW side of Chapman Reservoir. You stated on the phone that the subject well has been inactive for ~15 years.

The purpose of this letter is to inform you that Magpie Operating, Inc. (Magpie) has received approval to drill an oil and gas production well in your area. Magpie operations are subject to regulations as administered by the State of Colorado Oil and Gas Conservation Commission (COGCC).

The COGCC water well meeting Rule 318A.f.(2)C criteria in the vicinity of the drilling location can be tested for baseline water quality on a voluntary basis (if the water well is capable of producing a sample). Review of the Colorado Department of Water Resources (DWR) indicates that the subject well (DWR Receipt# C350044) is located on your property, at 32-5N-68W.

Please sign and return the attached postcard to either authorize or to decline access to the water well (to verify the inactive status and/or take a sample), located in 32-5N-68W Larimer County, Colorado. Please include a telephone number so that we can coordinate the event. Once we receive your response, Magpie or its consultant will contact you to schedule a convenient time to sample the water well. Please feel free to contact me at (720) 233-0875 with any questions and thank you in advance for your cooperation.

Sincerely,  
**Magpie Operating, Inc.**

A handwritten signature in black ink, appearing to read "Ryan Warner", with a long horizontal flourish extending to the right.

Ryan Warner  
Vice President

Please indicate below if you authorize or deny Magpie Operating, Inc. (Magpie) or its consultants access and/or to sample your water supply on behalf of Magpie Operating, Inc.

☐ YES, I grant access to my property to access and/or sample my water supply well.

*Confirmed access allows Magpie or its consultants to access and/or sample your water well and submit a copy of the results to the landowner as well as the Colorado Oil and Gas Conservation Commission (these results are publicly available).*
