## OPERATOR COMMENTS AND SUBMITTAL

Comments

Refile comment: This Form 2 is being submitted as a refile of API # 05-123-43630.

There have been no new buildings constructed and no changes to the surrounding land use, well construction plans, or mineral lease description. The well site has not yet been constructed. This location is not in a buffer or exception zone, so no notices are required under Rule 305.

As per the COGCC Refile Guidance Document dated March 20, 2017, no new plats or directional plans are required as the locations of the proposed wells have not moved. There are also no changes to the Surface & Minerals, Cultural Setbacks, Spacing & Formations, casing/cementing program, or Offset Well Evaluation. All previously submitted notices, Surface Use Agreements, and letters are also still valid.

There was a typo on the 1st string cement top & bottom on the original approved permit that is corrected in this refile.

This application is in a Comprehensive Drilling Plan No CDP #: \_\_\_\_\_

Location ID: 447824

Is this application being submitted with an Oil and Gas Location Assessment application? No

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

### **Best Management Practices**

**No BMP/COA Type**

**Description**

1	Drilling/Completion Operations	Blowout Prevention Equipment ("BOPE"): A double ram annular preventer will be used during drilling.
2	Drilling/Completion Operations	Multi Well Open-Hole Logging – Rule 317.p: Alternative Logging Program: One of the first wells drilled on the pad will be logged with open-hole resistivity log and gamma-ray log from the kick-off point into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall state "Alternative Logging Program -No open-hole logs were run" and shall clearly identify the type of log and the well (by API#) in which open-hole logs were run.
3	Drilling/Completion Operations	Anti-collision: Operator will perform an anti-collision evaluation of all active (producing, shut in, or temporarily abandoned) offset wellbores that have the potential of being within 150 feet of a proposed well prior to drilling operations for the proposed well. Notice shall be given to all offset operators prior to drilling.
