Comment Project area is surrounded by sagebrush shrubland. Revegetation is progressing within portions of the project area, but remains sparse in other portions. Revegetation needs to be monitored throughout the 2019 growing season. If revegetation is not approaching 80 percent reclamation standards by fall 2019, than additional revegetation measures will be required.

Comment: Many of the perimeter wattles around the well pad need maintenance and repair. Perimeter controls need to be maintained until location is stabilized.

Corrective Action: Repair/maintain and replace perimeter controls around the perimeter of the well pad where needed. Installation, repair, and maintenance should be conducted in accordance with good engineering practices such as those described in the CDOT stormwater control manuals.
