COMMENTS:

Paradox Upstream, LLC is requesting permission to add additional perforations in the already producing Honaker Trail/Hermosa formation. Please see the attached exhibits for detailed perf depths and wellbore diagrams.

In addition, it was noticed that the current Hermosa formation top listed on the COGCC scout card is incorrect. The Paradox geology department would like this depth to be changed to reflect the correct depth of 5617' MD. Additional support documents can be sent if requested.
