VEGETATIVE COVER _____

Comment: [The location has been recontoured and pits closed. All debris has been removed. There was predominately undesirable weed growth throughout the location and it appears seeding has failed as there was little to no desirable vegetation growth. High precipitation year should have established desirable vegetation growth. Correspondence indicated the location was seeded in the Fall of 2017. See Attached Photos](#)

Corrective Action:	Comply with 1004 Rules Control weed growth. Reseed the location.	Date	10/01/2019
Overall Final Reclamation	In Process	Well Release on Active Location	Multi-Well Location

COGCC Comments

Comment	User	Date
Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed the CRP mix used for the surrounding field. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.	CostaR	06/26/2019
