COMMENTS:

Based on the draft Notice to Operators dated November 4, 2015, the Commission requests for such authorization include:

- 1) The estimated volume and content of the gas to be flared.
- 2) Hydrogen sulfide gas analysis for the subject well.
- 3) For requests based on lack of available infrastructure, the operator must state:
 - a. Why the well cannot be connected to midstream infrastructure (e.g., remote area with no plans to constructed infrastructure) and an economic justification for this determination.
 - b. When the well(s) will be connected to midstream infrastructure, and why the operator commenced production of the well before midstream infrastructure was available.
- 4) A statement that the operator will comply with rule 805.b.(1).; and,
- 5) A statement that the operator will use and enclosed flare unless and open flare is specifically allowed by CDPHE's Regulation 7, and that any site specific permitting required by CDPHE is complete.

Extraction's Request

Answers to the questions listed above are as follows:

- 1) The estimated volume of gas to be flared is estimated to be 650MCF/month.
 - 2) No Hydrogen Sulfide (H₂S) is anticipated. At this time Axis is unable to get a gas analysis until the well is back running but will submit an analysis via Form 4 as soon as technically possible when the well is back on production.
 - 3) This well was stranded as part of the Third Creek shutdown and has been shut in. At its current production, it is uneconomical to bring in midstream pipe. Axis requests to flare to produce for the remaining lifetime of the well.
 - 4) The operator is intending to flare the associated gas and therefore will comply with the odor provisions of Rule 805.b.(1).
 - 5) Extraction intends to use a temporary or permanent enclosed combustion device for encountered gas from the wellhead and ECD's for compliance with storage tank emissions management. All other permitting and compliance provisions for the CDPHE are in process and will be followed as required.
- Please contact Jeff Rickard at (720) 737-5144 if you need further information.
