**General Comment:****COGCC Inspection Report 689802907 Summary**

On Friday 6/28/2019 at approximately 11:35, I, Inspector Emily Waldron, and Inspector Lou Colby conducted a joint field/stormwater/reclamation inspection at Sandridge Exploration & Production LLC Veneta 1-32D, at 324752 in Jackson County Colorado. While there, we observed injection.

During this inspection the following possible compliance issues were observed:

Non reportable spills - stained soil/gravel in multiple areas of location, oily waste inside berm, plastic stock tank full of and overflowing with oily liquid behind tanks inside berm. See photos 1-2 and 5-6. Comply with Rule 603.f, securely fasten all valves, pipes, and fittings to ensure good mechanical condition, inspect at regular intervals and maintain in good mechanical condition per Rule 605.d, control and contain spills/releases and clean up per Rule 906.a, and properly treat or dispose of oily waste in accordance with 907.e by 4/12/2019. Misc trash and debris remains on location and beginning to migrate off location. See photos 3-4. Comply with Rule 603.f by 4/12/2019. Vehicle tracking observed from location onto county road and from county road onto Colorado Highway 14. Site degradation occurring. All location stormwater BMPs need maintenance. Maintain vehicle tracking BMPs on the oil and gas location to comply with rule 1002.f.(2)F. If material is tracked onto County or public roads, contact the appropriate authority and install or repair required BMPs per Rule 1002.f. I called Aran Cook with Sandridge on 6/28/2019 at approximately 15:30 and left a voicemail informing him of waste in berm that needed to be removed immediately upon discovery.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report 689802907.
