General Comment:

This is an interim reclamation and stormwater inspection.
 This is also a follow up of the previous inspection#689900498 aand 689900897.
 Inspection sent to both operators since change of operator is pending approval.

The corrective action of the previous inspection has not been completed.
 Previous corrective action date remains for possible enforcement.
 Corrective action needs to be performed immediately.

Comment: Corrective Action: Date: **Good Housekeeping:**

Type	WEEDS		
Comment:	There are List B noxious weeds growing along the main road, access road, and location. Noxious weeds observed were Musk thistle, Canada thistle, and Houndstongue. Corrective action was not completed since previous inspection. Noxious weeds have now developed seed heads which must be cut, bagged, removed, and sprayed. See Attached Photos		
Corrective Action:	Comply with Rule 1003.f. Control noxious weeds.	Date:	07/10/2019
Type	WEEDS		
Comment:	Due to the extent of noxious weed infestation found field wide. The operator must submit a weed control plan for ongoing weed control practice. A detailed weed control plan should include timing of control, identification of noxious weeds, method of control, product information, equipment utilized, and location of control. It is recommended to consult the local weed control agency and have a qualified weed control expert assist with developing a field wide weed control plan. A plan was submitted but was inadequate. Operator was emailed to supply more information for a detailed weed control plan.		
Corrective Action:	Comply with Rule 1003.f. Provide a plan for ongoing weed control.	Date:	08/01/2019

Overall Final Reclamation		Well Release on Active Location		Multi-Well Location		
Storm Water:						
Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
Seeding	Fail	Check Dams	Fail			
Comment:		Rock check dams were installed since previous inspection but have filled in with sediment and failed. Sediment should be controlled from the source. A diversion ditch at the southwest side of the location is transporting sediment off location. BMP's such as a sediment trap are needed to prevent sediment erosion from leaving the site. See Attached Since previous inspection rock rip/rap was installed at the end of the diversion ditch. Sediment has since filled in the diversion ditch. Stormwater controls must be installed to good engineering practice. Corrective action was not completed since previous inspection. Photos				
Corrective Action:		Install or repair required BMPs per Rule 1002.f.				Date: 07/17/2019
Pits: <input checked="" type="checkbox"/> NO SURFACE INDICATION OF PIT						

COGCC Comments		
Comment	User	Date
Operator submitted FIRR for corrective action completed. This inspection documents that corrective action was not completed. It appears the operator submitted false information.	CostaR	07/19/2019
