Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Refer to Rules 340, 905, 906, 907, 908, 909, and 910

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

On January 15 and 16, 2019, Eagle installed 10 air sparge (AS) wells and 15 soil vapor extraction (SVE) wells at the Eldridge 4-23 site. AS/SVE conveyance lines were installed on January 30 and 31, 2019 and AS/SVE system startup activities commenced on February 15, 2019. Due to generator issues the AS/SVE system ran intermittently until February 22, 2019 when issues were resolved. The system has been operating consistently since that time.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Periodically going forward until all impacted soil areas above Table 910-1 limits are within compliance.

Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Quarterly groundwater monitoring samples from the monitoring wells for BTEX the 3rd month of each quarter until 4 consecutive quarters of Table 910-1 compliance has been achieved. As groundwater impacts decrease monitoring wells may be removed from the sampling plan as long as point of compliance is maintained.

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):

Re-install MW-18 to a more advanced depth.

☒ Is further site investigation required?

Quarterly groundwater monitoring samples from the monitoring wells for BTEX the 3rd month of each quarter until 4 consecutive quarters of Table 910-1 compliance has been achieved. As groundwater impacts decrease monitoring wells may be removed from the sampling plan as long as point of compliance is maintained. Re-installation of MW-18 to a more advanced depth.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No _____

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Initial source removal was completed via excavation in June 2017. Additional 1800 cubic yards of impacted soil were excavated to finish source removal activities in September 2018, and more carbon and gypsum amendment placed in the excavation before backfill in the SW corner of the site where the trench was opened up for amendment placement.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

REMEDATION COMPLETION REPORT

REMEDATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No _____

Do all soils meet Table 910-1 standards? No _____

Does the previous reply indicate consideration of background concentrations? _____

Are the only residual soil impacts pH, SAR, or EC at depths greater than 3 feet below ground surface? Yes _____

Does Groundwater meet Table 910-1 standards? No _____

Is additional groundwater monitoring to be conducted? Yes _____

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Location has been reclaimed and seeded per COGCC 1000 series rules.

Is the described reclamation complete? Yes _____

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

☐ Interim? ☒ Final?

Did the Surface Owner approve the seed mix? Yes _____

If NO, does the seed mix comply with local soil conservation district recommendations? Yes _____

OPERATOR COMMENT

This SF27 is to report 2019Q2 quarterly groundwater monitoring results, as well as to inform that SRC and Eagle Environmental plan to move forward with re-installing MWs 18, 21, 23, and 24 to a more advanced depth. All 2019Q2 figures, tables, and lab analytical reports related to groundwater sampling and AS/SVE O&M are attached to this document.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
