**Complaint**

Comment: Landowner would like the weeds controlled at well and tank battery. The weeds were being sprayed on 7/26/2019 during the inspection with a nonresidual spray for kochia. Inspector contacted the roustabout and operator about reclaiming the holes in the pasture that were made to find a flowline pressure test abnormality of ~1 psi. One connection of threaded tubing was loose ~60' from the wellhead and no stained soil was observed. Operator will reclaim dugup areas per the landowner. Inspector closed with a call to the landowner.
