Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On the afternoon of August 6, 2019, approximately 5 barrels of produced water was released outside of containment at the BABCOCK 19N-33HZ location (Location ID: 330811). This release was caused by a mechanical failure on a hydro-vac truck. The majority of the liquid was recovered from the pad surface and cleanup activities are currently underway. Excavation activities will be summarized in a forthcoming Supplemental Form 19 Spill/Release Report. A Topographic Map showing the geographic setting of the release is provided as Figure 1.
