Fluid(s) Spilled/Released (please answer Yes/No):

Was one (1) barrel or more spilled outside of berms or secondary containment? Yes

Secondary containment, **including walls & floor regardless of construction material**, must be sufficiently impervious to contain any discharge from primary containment until cleanup occurs.

Were Five (5) barrels or more spilled? Yes

Estimated Total Spill Volume: use same ranges as others for values

Estimated Oil Spill Volume(bbl): 0

Estimated Condensate Spill Volume(bbl): >=5 and <100

Estimated Flow Back Fluid Spill Volume(bbl): 0

Estimated Produced Water Spill Volume(bbl): 0

Estimated Other E&P Waste Spill Volume(bbl): 0

Estimated Drilling Fluid Spill Volume(bbl): 0

Specify: 10 bbls condensate released

Land Use:

Current Land Use: CROP LAND Other(Specify):

Weather Condition: Partly sunny, Wind to the north 7mp

Surface Owner: FEE Other(Specify):

Check if impacted or threatened by spill/Release (please answer Yes/No to all that apply):

Waters of the State ☐ Residence/Occupied Structure ☐ Livestock ☐ Public Byway ☐ Surface Water Supply Area ☐

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

While pulling production string with a work over rig the pipe got stuck in what is believed to be sand in the well. The rig pulled on the string when it suddenly released and the production string jumped and came out of hole approximately 12". The well was killed when the rams were activated. When this tubing came out of the well approximately 10 bbls of condensate blew out of the well under pressure and blew North misting a swath of ground inside the sound walls. The condensate mist blew over the sound walls outside of containment and covered approx. 1.75 acres of farmland directly north of the site. Apex environmental and cleanup crews are on location. The area that was sprayed will be scraped and disposed off. Top soil will be brought in to replace the soil removed.

Description

	Based on the information presented in site investigation and remdiation plan 12385, it is concluded that no further action is necessary at this time and the COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be impacted, then further investigation and/or further remediation activities may be required. In addition, the surface area disturbed by the remediation activity shall be reclaimed in accordance with the 1000 Series Reclamation Rules.
