<p>On (Thursday) (8/8/19) at approximately (1500)                      I, Inspector Dougo Wentzel, conducted a (Routine FIU General Field Inspection) at (Laramie) (Horseshoe canyon 1-27), (API #077-08663) in (Mesa) Colorado. While there, I observed (A Production Operation only.)                      During this inspection compliance issues were observed:                      Stormwater issues were observed:                      On the North side of location, heavy channeling and erosion are evident. Vegetation is being choked out by sediment moving off location. No BMP's are in place to slow or stop sediment movement. Sediment moving onto, across and then off location. See photos 6 through 13                      Erosion is evident along un-stabilized slope at the East side of location. Vegetation has been choked out by sediment. See photos 14 and 15.                      Erosion sediment moving off location on the North/West side of location, choking out vegetation. See photos 16 and 17.                      Erosion sediment moving off location and down access road at the entrance to location. BMP's need maintenance or are not in place. See Photos 18 and 19.                      (Refer to Corrective Action Matrix for comments, corrective actions, and corrective action date). Refer to photograph of observed. compliance issue.                      A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC Rules.                      (if correction actions are identified)                      This is a summary of inspection report.</p>	wentzeld	08/08/2019
