General Comment:

This is a Final Reclamation Inspection for PA Well API#103-10317, a Follow up to Insp Doc#692400573 dated 12/28/18. Scout card has Spud Date of 5/5/2003; Plugged and Abandoned 10/20/2004. Form 6S for this Well, Doc#1259035, does not appear complete and no cement tickets could be found in files. Inspection being referred to NW Area Engineering Dept. for determination of status.

CA from Previous Inspection has not been Resolved; site is and has been Out of Compliance since 10/20/2005.

Comment from previous inspection:

Other Operator submitted, 3/1/16, a Form 4 (#400998389) reporting Status of Reclamation at site & plans for continuing Reclamation activities. Other Operator, mistakenly thought this was a Historical site of theirs' that needed Final Reclamation for Bond Release. Reclamation activities at site had commenced when Eagle Operating corrected mistake & had Other Operator halt Reclamation activities.

1004.d. FINAL VEGETATION TRANSECT

TRANSECT RESULTS OF DISTURBED AREA% _____

TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: Location does not meet Final Reclamation requirements. The Location, including the well pad & access road, is not re-contoured, de-compacted, or properly re-vegetated. There is evidence of where Other Operator (as discussed in General Comment) had commenced Reclamation activities. Per COGCC 1004 Rules; Reclamation work was to be completed within 12 months on non-crop land after Plugging of Well, which would have been 10/20/05.

Corrective Action:	There are two CAs in this Section: 1) Perform Final Reclamation per COGCC 1004 Rules including re-contouring, seeding of site and access road. Install appropriate BMPs to stabilize location until vegetation establishes; all Reclamation Activities to be complete by May 1, 2019. 2) Contact NW Area engineer re: Form 6S - if any further information is needed by 8/27/19.	Date 08/27/2019
