Melissa,

I have checked with our team on a response to your question on any communication with Aurora for this well, and looks like Aurora is aware of this location. As part of the Arapahoe County permitting process, many ConocoPhillips applications are sent to the City during the comment period as a referral. Due to the proximity to the City boundary, this project was referred to the City for comment. To our knowledge, the City did not enter any comments into the record as part of the Local permitting process. There are not Conditions of Approval attached to the permit by Arapahoe County as result of the Aurora referral.

Additionally, ConocoPhillips has informally shared information about our development plans in Arapahoe County with the City on a regular basis. In this case, the private access road used for the State Bierstadt will enter onto Yale Avenue, which is maintained by the City. ConocoPhillips has a Master Road Maintenance Agreement in place with the City of Aurora for use of Yale Avenue. If any damage were to occur on Yale Avenue as a result of our planned operations, it would be subject to the remedies outlined in that agreement."

Feel free to let me know if you have any additional questions on this, happy to help!

Thank You,

Larry Smith
