FIELD INSPECTION FORM

Loc ID 464230 Inspector Name: Graber, Candice (Nikki) On-Site Inspection 2A Doc Num: _____

Status Summary:

- THIS IS A FOLLOW UP INSPECTION
- FOLLOW UP INSPECTION REQUIRED
- NO FOLLOW UP INSPECTION REQUIRED

Operator Information:

OGCC Operator Number: 3940
Name of Operator: ARISTOCRAT GAS PRODUCTS CO
Address: P O BOX 430
City: FORT LUPTON State: CO Zip: 80621

Findings:

- 2 Number of Comments
- 0 Number of Corrective Actions
- Corrective Action Response Requested

ANY CORRECTIVE ACTION(S) FROM PREVIOUS INSPECTIONS THAT HAVE NOT BEEN ADDRESSED ARE STILL APPLICABLE

General Comment:

On Monday July 15, 2019 at approximately 10:30, COGCC environmental personnel inspected the former Aristocrat Gas Plant in response to an environmental report provided by American Environmental Consulting (AEC) under Remediation #3. Per the report all wells were sampled, as requested by the COGCC, with the exception of RW-02. The reason for not conducting the required sampling was stated as "insufficient volume water". The report also concluded that all wells with the exception of RW-01 should be abandoned. COGCC personnel accessed RW-02 and utilizing an oil water interface probe gauged the depth to water at 17.5' and a sheen was detected on the surface of the water column; consistent with the reported depth from AEC. The bottom of the well was gauged at approximately 30' with a soft bottom, no obstruction was encountered. Utilizing a new disposable bailer a sample was collected for analytical. Water was dark grey with a strong hydrocarbon odor. Standard environmental purge protocol was not followed due the presence of impacts. The sample was hand delivered to TestAmerica in Denver for laboratory analytical. Results, attached, indicated that groundwater in RW-02 was not compliant with Table 910-1 for Benzene. See documentation under Remediation #3 for additional sampling and correspondence relating to this inspection and sample results.
