Comment

This location is not in compliance with Rule 1003. Per Rule 1003.e.(1), Operators shall control and manage both undesirable species and noxious weeds, and to control erosion. An unknown disturbance along the northern facility was observed within the Interim Reclamation area where weeds are not being managed. Weeds were observed throughout other portions of the location. Refer to the attached inspection photos.

Sediment discharge and erosion off location were observed. BMP maintenance is required along the northeastern facility. Also, the installed stormwater BMPs do not appear to be installed with good engineering practices, as the check dams are spaced too far apart to slow the velocity of stormwater runoff.

Corrective Action

Comply with Rule 1003.e.(1). Corrective action date is the date to location was observed out of compliance, as the location should be in compliance at all times.
