Gentlemen:

Although we have already approved a plugging report for this well on June 22, 1967 we would appreciate a more complete description of the final plugging procedure. We are uncertain from your reports (both the plugging and completion reports) if a surface plug was ever placed.

In addition please advise if the site has been cleared and leveled.

We hope to make a final inspection of the site before giving permission for cancellation of the bond.

Very truly yours,
Oil and Gas Conservation Commission
