## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
No	SOILS	No impacts	Laboratory analysis

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A hot oiler was heating the tank when a possible air bubble in the line caused condensate to burp out of the top. A total of approximately 5 barrels was spilled inside and outside of containment. A vacuum truck arrived on location to pull the water pit right after the incident, so the lease operator was able to get him to vacuum up the standing product immediately. Cleanup continued until all impacted or potentially impacted soils were removed via hydrovac.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Yes, 5 grab samples will be collected: 4 from the previous extents of the sidewalls at approximately 1' bgs and 1 from the center at the previous extents of the base at approximately 2' bgs.

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered, a sample will be collected and analyzed for BTEX.

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

## Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Impacted soil was removed by vacuum truck and disposed of at a permitted disposal facility. If soil samples show impacts above Table 910-1 standards, then further excavation will be done.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Approximately 70 cubic yards of contaminated or potentially contaminated soil were excavated and disposed of at a permitted disposal facility. Waste manifests are kept on file and available upon request.
