Graham-Michaelis Drilling Co.  
Attn: Mr. John L. James  
211 North Broadway  
Wichita 2, Kansas

Gentlemen:

We are returning herewith, not approved, your notices of intention to abandon the El Clyde Haynes well in section 14, Township 8 North, Range 48 West, and the Lyle Scott well in section 3, Township 8 North, Range 48 West.

The approval is being withheld on these wells for two primary reasons. First, the method of plugging is not satisfactory since we require some type of cement plug in the bottom either across perforations before pulling pipe or in the stub after cutting and pulling. The second reason is that no date of plugging is given; in this regard, we must be advised of the date of plugging either by form or by phone prior to plugging since it is our practice to have a man if available on location when you set the downhole plug.

We would also like to point out that there is a discrepancy between the perforations on these forms and on the original completion reports.

If you have any questions regarding the above please contact us.

Very truly yours,

OIL AND GAS CONSERVATION COMMISSION

William R. Smith, Senior Petroleum Engineer
