General Comment:

On 09/11/2019, Reclamation Specialist Trujillo conducted a reclamation and stormwater inspection at Omimex Petroleum's Bledsoe 6-30-3-43 location in Yuma County, Colorado.

It was observed that:

Well has not been completed. Majority of location and access road has revegetated though erosion degradation evident along the access road.

The following alleged compliance issues were observed during this inspection:
1002.f: Erosion degradation along access road.

Refer to the "Stormwater" section of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Location**Lease Road:**

Type	Access		
comment:	<p>Aerial imagery shows access road travels south from the southwestern end of the location ~500 feet, turns west and continues ~1200 feet west/northwest to a North/South traveling road at 40.199052°/-102.222500°.</p> <p>Access road was initially difficult to identify during the inspection due to vegetation having re-established over a large majority of the access road.</p> <p>Erosion degradation was observed along access road. See "stormwater".</p>

TRANSECT RESULTS OF DISTURBED AREA% _____

TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

1003 f. Weeds Noxious weeds? _____ P _____

Comment

Vegetation throughout a large majority of the location has re-established and no immediate concerns were observed.

It is noted that there are areas on the east end of the location where vegetation has not re-established; Potential risk of wind erosion exist within these areas. See photo 11.

Continue to monitor and manage location to ensure site remains stabilized.
