General Comment:**COGCC Inspection Report 689803115 Summary**

On Saturday 9/7/2019 at approximately 12:45, I, Inspector Emily Waldron, conducted a field inspection at Gulf Exploration LLC Eagle Hill 1-32, at 05-057-06625 in Jackson County Colorado.

While there, I observed that rig equipment had been moved onto location and a spudder rig was setting the conductor.

During this inspection the following possible compliance issues were observed:

No signs on location. No emergency contact on location. Install sign to comply with Rule 210 immediately.

Some gravel has been added to access road. No stormwater controls observed for sediment on roadsides. Wattles have been placed on one side of culvert at drainage crossing and along south and west sides of location. Wattles have not been trenched and there is open space between wattles and ground surface. The need for immediate installation of appropriate stormwater controls remains. See photos 5-10. Install or repair required BMPs per Rule 1002.f immediately.

Vehicles and equipment are being parked off location and access road. Vehicles driving off access road. See photos 1-4. Contact COGCC Reclamation staff to discuss this issue in greater detail and determine adequate next steps per Rule 1002.e by 9/10/2019.

I spoke with John Symonds, contractor for Gulf Exploration, on location and explained that appropriate stormwater controls includes proper installation. I spoke to Sean Strickland of Gulf Exploration and advised him that an NOAV for stormwater would be forthcoming.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report 689803115.
