Comment:

Walked to the site from the northwest access. There was an area at the beginning of the access road that had noxious weeds, Canada thistle. The area along the access road to the first rip/rap drainage had annual weeds and some perennial grasses. There were noxious weeds at the first rip/rap. Further along the reclaimed road and at the location, perennial vegetation was establishing well. There were some noxious weeds near the location and there was pile of weeds that had been cut and left in a pile. The weeds should be cut, bagged, removed, and treated. See attached photos

Corrective Action:

Comply with 1004.e.
Control noxious weeds.
