General Comment:

On 9/10/2019, Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Noxious weeds identified within the outer revegetation area need to be controlled by September 30, 2019.

-Revegetation and stabilization measures are needed throughout the outer revegetation areas as little desirable vegetation observed. This needs to be installed by November 1, 2019.

See attached photos and below for additional detail.

1003 f. Weeds Noxious weeds? F

Comment Outer reclamation areas are infested with multiple species of noxious weeds, thousands of individuals observed. Little desirable vegetation present and revegetation is failed within the outer reclamation areas.

Corrective Action Control weeds by September 30, 2019. Revegetation and stabilization measures for bare and weedy revegetation areas need to be installed by November 1, 2019. Mulching is recommended for stabilization of bare soils and revegetation success.

Comment:	Bare soils and weedy soils are not stabilized, areas where concentrated stormwater flows off of the working area.	Date: 11/01/2019
Corrective Action:	Install soil stabilization measures such as revegetation, mulching, and stormwater BMPs as needed to stabilize erosion within the project area.	

Pits: ☒ NO SURFACE INDICATION OF PIT
