Comments:

SRC completed final reclamation for the Davis 33-16 well head and production facility 9/24/2018. SRC removed road base, recontoured, added topsoil for proper elevations, deep ripped, disked, crimped and seeded. Well is in irrigated pasture, so proper grading was achieved to ensure drainage of irrigation. The well head and production facility are in its first growing season and have not reached 80% re-growth compared to reference areas around the well and facility. SRC will continue to monitor the area for growth and weed control until the 80% is achieved, and will submit a final form 4 at that time.
