Dear Sir:

In April I inspected your Tetsell C #1 well in SESW32-9N-53W of Logan County. No sign is in place as required by Rule 604.c(4) and the pit is being siphoned into a ditch which runs into a stock pond about half a mile away. You are hereby directed to cease discharging water from these pits immediately and until you can furnish the Commission with an approved discharge permit from the Division of Water Quality. This is not a step taken lightly as it may mean abandonment of the well. However, the water produced by this lease is potentially harmful to people, livestock and wildlife.

If you have questions or comments about this letter please contact me at the above address or phone number.

Sincerely,

A handwritten signature in cursive script that reads "R. Van Sickle".

Robert J. Van Sickle
Field Engineer
