**General Comment:**

COGCC Environmental Inspection to determine the status of pit facility ID 114239. Any corrective actions from previous inspections that have not been addressed are still applicable.

COGCC personnel found no surface indication of a pit present in the location. Records review and aerial photos found no evidence that there was a produced water pit on location; historic inspection reports document a concrete water vault on location. The pit status has been changed to closed, however, no associated remediation or site investigation has been conducted. Should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be impacted, then further investigation and/or remediation activities may be required.

Photos attached to document site condition at the time of inspection.
