Hi Dave,

Good news that you are meeting again with the Director Robbins this morning at 10 AM.

The proposed Welba Peak Gathering Line will tie the WPU 36-1V-H2 and the development wells in the Welba Peak Federal Unit north to the tie-in to the Slater Dome Gathering Line in northeasternmost Moffat County. The proposed gathering line is 100% on Fee surface. We have ROW agreements or ROW Options from all of the fee surface owners along the proposed route. In addition, we have the Corp of Engineers permits to cross the three creeks along the first part of the route, Roaring Fork, Beaver Creek, and Slater Creek.

Also, we have the approved permit from Moffat County to install the gathering line. The gathering line route is about a mile west of the Moffat County line. It is 100% in Moffat County.

Please let me know if you need any more information.

As always, thanks for your help.

John Carmony
Carmony Exploration, LLC

Subject: PRM Pipeline Permitting Question

John,

Here is a question from COGCC Denver: Who permits the pipeline? It's a mix of fee and fed surface, but the ROW appears to follow all fee surface overlying fed minerals.

If you have any questions, please do not hesitate to call me at [\(970\) 309-2514](tel:9703092514) (cell), or email.

Thanks.

Dave
