Longs Peak Resources, LLC (LPR) previously had a consultation with Ron Kreps, the former President of Lazy D Grazing Association, the Landowner, prior to seeding the pad site as a part of the interim reclamation procedures. The consultation was in addition to the Surface Use Agreement that was previously established and effective. The seed mix, PBSI Dryland Aggressive Pasture Mix #1, that was used was approved by the Landowner at the time of the consultation. The Landowner hereby agrees that the seed mix, PBSI Dryland Aggressive Pasture Mix #1, used was the authorized seed mix at the time of interim reclamation for the locations listed above.
