#### **No BMP/COA Type**

#### **Description**

1 Drilling/Completion Operations	Alternative Logging Program: One of the first wells drilled on this pad will be logged with an open-hole resistivity log with gamma-ray, from TD into the surface casing. All wells on the pad will have a cement bond log (CBL) with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs will state "Alternative Logging Program - No open-hole logs were run" and will clearly identify the type of log and the well (by API#) in which open-hole logs were run.

<b><u>User Group</u></b>	<b><u>Comment</u></b>	<b><u>Comment Date</u></b>
Permit	Changed local government disposition from "Waived" to blank. As noted in comment, Garfield County considers oil and gas development a use by right and is therefore not subject to local government siting. No waiver is needed, nor was a waiver provided.	09/20/2019
Permit	Final Review Completed.	09/19/2019
Permit	The Director Objective Criteria Review Summary (Doc#2108932) is attached to this Form 2 Application for Permit to Drill (APD). Following additional analysis of the Director Objective Criteria, the Director determined that this application meets the standard for the protection of public health, safety, welfare, the environment and wildlife resources set by SB 19-181.	09/19/2019
Engineer	Offset water well check: COGCC evaluated offset water wells within one mile of this proposed well surface hole location. This information was used in addition to locally-available geophysical logs and hydrogeologic information to evaluate the adequacy of the operator's proposed surface casing setting depth. The deepest water well within one mile of this proposed surface hole location is 0'. Operator's proposed surface casing will cover all current water wells within one mile of the surface hole location.  Offset Well Evaluation: Existing offset oil and gas wells within 1,500 feet of this wellbore meet standards. No mitigation required.	07/19/2019
Permit	Passed completeness.	07/17/2019
