Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

The leak was discovered by the pumper early Thursday afternoon [4-25-2019]. The pumper immediately shut-in the well and drove to the location of the leak. An estimated 1.5 BO and 80 BW was leaked on the ground and drained to the north and northwest covering an area 10' wide by 75' long. The surface owner was contacted and a roustabout crew was called to come fix the leak and remove the impacted soil. There was no standing water or crude oil at the site. The roustabout crew arrived the next morning and fixed the line leak and picked up roughly two yards of impacted soil and relocated it to a location at the tank battery [a picture of the actual leak in the flowline will be submitted on a supplemental report].

**Description**

|  |   |
|--|---|
|  | Based on the information presented, it appears that no further action is necessary at this time and the COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be impacted, then further investigation and/or remediation activities may be required. In addition, the surface area disturbed by the remediation activity shall be reclaimed in accordance with the 1000 Series Reclamation Rules. |
