General Comment:

This is a follow up inspection to COGCC Inspection #682600588 which found a 1" ball valve venting gas at the time of inspection on 12/20/2018 (NOAV 401954589 issued). Current inspection found the valve and piping to the valve have been removed (see attached photo).

A 4 gas meter detected 29 lower explosive limit (LEL) at the base of the wellhead (see attached video). LEL of 18 was detected approximately 10 feet from wellhead. Well is located in an suburban area in between two single family homes. Operator informed of leak via phone call on 10/8/2019 and field personnel were on site to address mechanical issue the afternoon of 10/8/19.

LocationOverall Good: ☐
