Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Vanguard Operating personnel identified a condensate release within the production tank secondary containment at Vanguard's Gibson Gulch Unit-66S91W/29SWSW location at approximately 0935 on 7/22/2019. The release occurred due to a production tank overflow and condensate was released from the thief hatch and PRV. All of the released condensate remained inside the earthen berm secondary containment. Production operations have been shut-in and the tank has been evacuated of all fluids. The tank is scheduled to be removed today and excavation activities are to begin on Wednesday. A third-party consultant will be on location during the excavation activities and will be screening soils and collecting confirmation samples as necessary.

Was there a Grade 1 Gas Leak associated with this E & P waste spill or release? Yes  No

If YES, enter the Document Number of the Initial Grade 1 Gas Leak Report Form 44: \_\_\_\_\_

Was there a reportable accident associated with this E & P waste spill or release? Yes  No

If YES, enter the Document Number of the Initial Accident Report, Form 22: \_\_\_\_\_

**REQUEST FOR CLOSURE**

**Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.**

Basis for Closure:  Corrective Actions Completed (documentation attached)

Work proceeding under an approved Form 27

Form 27 Remediation Project No: 14050

**OPERATOR COMMENTS:**

In response to COA #1 associated with approved Form 19 (Doc#402143100), the laboratory incorrectly reported a trivalent chromium concentration of 7,200,000 mg/kg instead of 7.2 mg/kg in soil sample W. Floor @ 10' collected on 7/25/2019. The corrected laboratory analytical report is attached. Please reference approved Form 27 (Doc#402149004) which addresses the other COAs associated with Doc#4022143100.

Vanguard has been in communication with the COGCC regarding COA #4 "submit an eForm 19 initial with supplemental to report historical impacts associated with tank battery" and these communications ended today. Vanguard will prepare and submit the requested F19 report and request "closure" with all remediation associated with the recent release or the the perceived historical impacts encountered during excavation under Remediation #14050.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
