**COA Type**

**Description**

Drilling/Completion Operations	1)Operator shall comply with the most current revision of the Northwest Notification Policy.  2)Operator shall comply with the most current revision of the Garfield County Rulison Field Notice to Operators, with the following exception: All field notice requirements specified in that Notice to Operators are superseded by the requirements of the most current revision of the Northwest Colorado Notification Policy (see Condition of Approval #1).  3)Operator shall provide cement coverage from the production casing shoe (4+1/2" FIRST STRING) to 200' above the Wasatch G. Isolation is required due to offset Wasatch G Sand production. Verify production casing cement coverage with a cement bond log.

### **Best Management Practices**

**No BMP/COA Type**

**Description**

1 Drilling/Completion Operations	Alternative Logging Program: One of the first wells drilled on this pad will be logged with an open-hole resistivity log with gamma-ray, from TD into the surface casing. All wells on the pad will have a cement bond log (CBL) with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs will state "Alternative Logging Program - No open-hole logs were run" and will clearly identify the type of log and the well (by API#) in which open-hole logs were run.

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Permit	Final Review Completed.	10/10/2019
Permit	Changed local government disposition from "Waived" to blank. As noted in comment, Garfield County considers oil and gas development a use by right and is therefore not subject to local government siting. No waiver is needed, nor was a waiver provided.	09/30/2019
Permit	The Director Objective Criteria Review Summary (Doc#2109043) is attached to the Form 2A associated with this APD. Following additional analysis of the Director Objective Criteria, the Director determined that this application meets the standard for the protection of public health, safety, welfare, the environment and wildlife resources set by SB 19-181.	09/30/2019
Engineer	<p>Offset water well check: COGCC evaluated offset water wells within one mile of this proposed well's surface hole location. This information was used in addition to locally-available geophysical logs and hydrogeologic information was used to evaluate the adequacy of the operator's proposed surface casing setting depth. The deepest water well within one mile is 175 feet.</p> <p>Offset Well Evaluation: Existing offset oil and gas wells within 1,500 feet of the wellbores on this pad meet standards.</p> <p>Removed operator's proposed first string cement top. Operator's proposed first string cement top is not adequate to satisfy isolation requirements due to Wasatch G production within one mile. Increase cement coverage accordingly as specified in Condition of Approval #3. Addition of a stage tool to the casing design requires approval on a sundry notice.</p>	09/20/2019
Permit	Passed Completeness.	08/21/2019
