**General Comment:**

This is a joint inspection between COGCC Environmental and Reclamation groups. COGCC Environmental Group has issued a corrective action inspection (Field Inspection Report Doc.#691201173 submitted on 10/15/2019).

COGCC Reclamation staff performed two Final Reclamation Inspections for PA Well API#123-11822 and its associated tank battery location (Doc.#682404145 and Doc.#697500587).

This is a Final Reclamation Inspection for the associated compressor station.

This inspection is being entered for notification and documentation only and is not intended to provide the Operator the opportunity to resolve the alleged violations without the imposition of a penalty, pursuant to Rule 522.c.

Comment: This location is not in compliance with Rule 1004.a. Reclamation rules require reclamation activities to be conducted within three months of plugging on cropland. Well was plugged 12/09/2016. Operator failed to perform final reclamation activities, as concrete pads, trash, and improperly stored chemical container remain at location. In addition, Kochia and Russian thistle has not been managed. Refer to the attached inspection photos.
