Description

Operator Comments:

At the time of permitting the Interchange B N35-20-3N, the associated anti-collision report showed Crestone Peak's Kats 31-34 well (API #05-014-2653) at ~155' from the proposed wellbore so no 317.s Stimulation setback consent was required. After drill, it was discovered that the horizontal wellbore fell within 150' of Crestone's existing Kats 31-34. This sundry has been submitted to submit the signed 317.s stimulation setback consent. Please find the pre and post drill anti-collision reports attached as "other" for your reference.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
