## **SOURCE REMOVAL SUMMARY**

Describe how source is to be removed.

SOIL COLLECTED WITH SHOVEL FROM BOTTOM OF PIT.

## **REMEDICATION SUMMARY**

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Stelbar was originally going to plug the Burns well out and close the pit for that reason. However, the well was put back onto production and the pit has been used since. So this pit closure is no longer necessary and should be closed out.
