RECEIVED  
NOV 26 1991  
COLO. OIL & GAS CONS. COMM.

RE: Michigan 31-18 NW NE S18, T7N, R60W

Mr. Van Sickle;

Work on this well was begun on September 26, 1991. Work was completed on November 5, 1991. Work was performed as follows:

A cast iron bridge plug was set at 6200' by Bran De-X wire line services. 2 sacks cement was dump bailed on plug. 5½" casing was cut at 4800' and pulled to 211' where a 30 sack plug was mixed and pumped. Remaining casing was laid down, 8 5/8" surface casing was cut off 4' below ground level, 10 sacks cement was spotted in top and a cap was welded on.

Sincerely,

*G. E. Naill*

G E Naill

Bob, we dug out the dead men and some riser pipes that were sticking out of the ground and cut them off. Location is clean other than the mound the pumping unit was setting on.
