 Inspection Document #'s 693501790,693501711,693501739
 Complaint Inspection Document # 693501804
 Complaint Document #200448317
 Nature of Complaint: Noise
 Field Inspector Actions:
 On 11-17-2019, I Randy Silver area field inspector was assigned a complaint received by COGCC staff in reference to Noise. The complainant Rod Brueske Longmont CO stated the issues were occurring outside of complainants home.
 On 11-19-2019, I attempted to make contact with the complainant who indicated that on 11-17-19 he was woken up out of a sound sleep. His house was vibrating. I spoke with Mr. Brueske via email to set up sound study equipment at his residence he stated not wish to do that at this time.
 I performed a complete site inspection of the oil and gas location and associated wells in the area. At time of inspection, I did not hear any unusual Noise in or around location. Along with third party sound study information provided by Crestone, COGCC performed sound study from November 12 to November 15. See above inspection documents for set up and removal. Sound study information from November 12 to November 17 will be attached to the Complaint inspection doc# 693501804. At time of removing COGCC sound date equipment it was observed, large volume of machine and truck traffic was driving by sound data equipment during the daytime hours from farmer bringing in crops. At time of inspection, I spoke with fracing supervisor, he stated at time of complaint they were fracing and no unusual activity was taking place. Also after speaking with supervisors, one crew rigged out on 11-17-19, 2nd crew should be done on 11-20-19 and last crew should be completed on 11-24-19 if everything goes as scheduled.
 Weather conditions: Cloudy and location dry
 See inspection document #693501790 per my inspection.
 No violation of COGCC rules were observed at the time of the inspection.
