General Comment:

This is a Final Reclamation Inspection for PA Well AP#103-06347. There is no Spud date in Doc files; Sundry 8/1966 reported deepening of Old Hole shut down in 1953. Well was plugged and Abandoned 11/16/1999.

Submittal of Inspection was delayed as it was mistakenly thought site was an Orohan Well location and would be submitted after Summer work schedule slow down; however Location was found to have a viable Operator. CAs have been dated with consideration of delayed receipt.
