INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Produced water dump line failed, releasing approximately 2 on barrels. Site was shut in.
On June 18, 2019 Tasman completed a site assessment to determine potential soil and groundwater impacts associated with the dump line release at the Foster 3-35, 6-35, UPRR 53, Pan Am 2 tank battery. Seven boreholes were installed via hand auger. Soil samples were collected above the phreatic zone and submitted under proper chain of custody procedures to Summit Scientific for analysis of TPH-DRO, TPH-GRO, BTEX, and Naphthalene by EPA Methods 8015 and 8260b. A base groundwater sample was also collected and analyzed for BTEX. First assessment was inconclusive. Additional assessment scheduled.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

A second site assessment with mechanical drilling methods is scheduled for September 11, 2019. Five boreholes will be installed and soil samples will be collected above the phreatic zone and submitted under proper chain of custody procedures to Summit Scientific for analysis of TPH-DRO, TPH-GRO, BTEX, and Naphthalene by EPA Methods 8015 and 8260b.

Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Five temporary monitoring wells will be installed to evaluate potential dissolved phase impacts to groundwater. Temporary monitoring wells will be developed and sampled using a dedicated, disposable, polyethylene bailer. The groundwater samples will be submitted to Summit for BTEX analysis using USEPA method 8260B.

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):
