Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27.

This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Refer to Rules 340, 905, 906, 907, 908, 909, and 910

## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	200' x 200'	potholes/lab analysis

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

The source area was immediately exposed to 8' below ground surface (BGS). Free product was removed via vacuum truck and 39 potholes were installed to delineate the lateral and vertical extents of the impacts. Based upon visual inspections and field screenings, the subsurface impacts are limited from ~5' BGS to 7' BGS.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

A minimum of 2 grab samples will be collected from each sidewall and 4 bottom hole samples will be collected and submitted for laboratory analysis of TPH and BTEX to confirm that the extents of the impacted soils have been removed to < Table 910-1 Concentrations Levels. The excavated stockpiled overburden soils (<5' BGS) will be field screened via a calibrated PID every 100 cubic yards and the highest field result per 5 piles (500 cubic yards total) will be sampled (5-part composite) and submitted for laboratory analysis of TPH and BTEX to document that the overburden soils are < Table 910-1 Concentration Levels. In addition, a 5-part composite sample will be collected from the excavated impacted soils every 100 cubic yards and submitted for laboratory analysis of TPH and BTEX to document that any potential residual impacts are <Table 910-1 Concentration Levels.

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

# SITE INVESTIGATION REPORT

## SAMPLE SUMMARY

### Soil

Number of soil samples collected 274  
Number of soil samples exceeding 910-1 209  
Was the areal and vertical extent of soil contamination delineated? Yes  
Approximate areal extent (square feet) 12000  
0

### NA / ND

-- 53400 Highest concentration of TPH (mg/kg)  
NA            Highest concentration of SAR  
BTEX > 910-1 Yes  
Vertical Extent > 910-1 (in feet) 14

### Groundwater

Number of groundwater samples collected 0  
Was extent of groundwater contaminated delineated? No  
Depth to groundwater (below ground surface, in feet)             
Number of groundwater monitoring wells installed             
Number of groundwater samples exceeding 910-1           

           Highest concentration of Benzene (µg/l)  
           Highest concentration of Toluene (µg/l)  
           Highest concentration of Ethylbenzene (µg/l)  
           Highest concentration of Xylene (µg/l)  
           Highest concentration of Methane (mg/l)

### Surface Water

0 Number of surface water samples collected  
           Number of surface water samples exceeding 910-1  
If surface water is impacted, other agency notification may be required.

## OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards)            Volume of liquid waste (barrels)           

Is further site investigation required?

# REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No \_\_\_\_\_

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

The surface equipment (tanks, LACT, water skid, and other equipment) and subsurface piping will be removed to all for the mechanical excavation of the impacted soils.

## REMEDICATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

The non-impacted overburden soils (<5' BGS) will be excavated and staged onsite and the impacted subsurface soils (~5'-7' BGS) will be excavated and staged separately onsite. Due to the presence of sedimentary rock at the impacted strata the soil remediation options will be evaluated and will likely consist of one or a combination of onsite rock crushing, soil shredding, and chemical oxidation.

## Soil Remediation Summary

In Situ

\_\_\_\_\_ Bioremediation ( or enhanced bioremediation )  
\_\_\_\_\_ Chemical oxidation  
\_\_\_\_\_ Air sparge / Soil vapor extraction  
\_\_\_\_\_ Natural Attenuation  
\_\_\_\_\_ Other \_\_\_\_\_

Ex Situ

No \_\_\_\_\_ Excavate and offsite disposal  
If Yes: Estimated Volume (Cubic Yards) \_\_\_\_\_  
Name of Licensed Disposal Facility or COGCC Facility ID # \_\_\_\_\_  
Yes \_\_\_\_\_ Excavate and onsite remediation  
No \_\_\_\_\_ Land Treatment  
No \_\_\_\_\_ Bioremediation (or enhanced bioremediation)  
No \_\_\_\_\_ Chemical oxidation  
Yes \_\_\_\_\_ Other crushing, shredding, chemical oxidation,  
and/or soil blending as deemed  
necessary \_\_\_\_\_

## Groundwater Remediation Summary

No \_\_\_\_\_ Bioremediation ( or enhanced bioremediation )  
No \_\_\_\_\_ Chemical oxidation  
No \_\_\_\_\_ Air sparge / Soil vapor extraction  
No \_\_\_\_\_ Natural Attenuation  
No \_\_\_\_\_ Other \_\_\_\_\_

## GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

## REMEDIATION PROGRESS UPDATE

### PERIODIC REPORTING

Frequency:  Quarterly  Semi-Annually  Annually  Other upon completion of soil remediation

Report Type:  Groundwater Monitoring  Land Treatment Progress Report  O&M Report  
 Other Site Assessment Update

### WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? Yes

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

The treated soils will be sampled and utilized to backfill the excavation.

Volume of E&P Waste (solid) in cubic yards 18000

E&P waste (solid) description hydrocarbon impacted soils

COGCC Disposal Facility ID #, if applicable: 0

Non-COGCC Disposal Facility:

Volume of E&P Waste (liquid) in barrels 8

E&P waste (liquid) description recovered crude oil

COGCC Disposal Facility ID #, if applicable: 440165

Non-COGCC Disposal Facility:

## REMEDIATION COMPLETION REPORT

### REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

Do all soils meet Table 910-1 standards? \_\_\_\_\_

Does the previous reply indicate consideration of background concentrations? \_\_\_\_\_

Are the only residual soil impacts pH, SAR, or EC at depths greater than 3 feet below ground surface? \_\_\_\_\_

Does Groundwater meet Table 910-1 standards? \_\_\_\_\_

Is additional groundwater monitoring to be conducted? \_\_\_\_\_

## RECLAMATION PLAN

### RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

The treated soils and overburden soils will be incorporated into the subsoil cut slope at a depth >3' BGS once the Table 910-1 thresholds are met to further downsize the pad for interim reclamation. Compaction will be reached via heavy equipment, recontouring to the surrounding surface, reseeded, crimped, and weeds will be chemically controlled (if necessary). The straw mulch will be applied at a rate of 1.5-2 tons per acre and the seed mix consists of: buffalo grass, western wheatgrass, sideoats grama, green needle, rocky mountain beeplant, blue grama, and prairie coneflower and will be applied via disk seeder at a rate of 50lbs/1.455 acre. Vegetation density will be compared to vegetation that is outside the disturbed area until cover has been established at 80% pre-disturbance levels.

Is the described reclamation complete? \_\_\_\_\_

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim?  Final?

Did the Surface Owner approve the seed mix? \_\_\_\_\_

If NO, does the seed mix comply with local soil conservation district recommendations? \_\_\_\_\_

## IMPLEMENTATION SCHEDULE

### PRIOR DATES

Date of Surface Owner notification/consultation, if required. 03/29/2017

Actual Spill or Release date, if known. 03/28/2017

### SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 03/28/2017

Date of commencement of Site Investigation. 01/22/2018

Date of completion of Site Investigation. \_\_\_\_\_

### REMEDIAL ACTION DATES

Date of commencement of Remediation. \_\_\_\_\_

Date of completion of Remediation. \_\_\_\_\_

### SITE RECLAMATION DATES

Date of commencement of Reclamation. \_\_\_\_\_

Date of completion of Reclamation. \_\_\_\_\_

### OPERATOR COMMENT

This supplemental report is intended as an update of the remediation activities conducted regarding remediation projects 13769 and 11043. The attached site map depicts the final confirmation samples taken at the current excavation limits. Based upon these confirmation samples being < Table 910-1 we intend on backfilling the excavation.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
