VEGETATIVE COVER \_\_\_\_\_

Comment:

Vegetation inside fenced exclusion area and along & in access road footprint remains sparse and consists mainly of low growing weedy species. Operator had indicated that re-seeding with amendments would be conducted in Fall 2018. It maybe, that prior use (contamination) or lack of topsoil has affected vegetation establishment, indicating need for further assessment.

Noxious weed control appears to be ongoing on site. Pasture outside of exclusion fence has not been as heavily grazed this season & vegetation appears more robust except for access road area.

Corrective Action:

Assess vegetation & site conditions (weather permitting) in Fall 2019. Apply remedies /conduct reclamation activities needed, AS indicated by assessment, to ensure the uniform establishment across the site of desirable vegetation. Any Reclamation Activities indicated to be complete by June 1, 2020.
