RECLAMATION**INTERIM RECLAMATION**

☐ Interim Reclamation will commence approximately _____

Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Interim reclamation complete, site ready for inspection.

Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

Field inspection will be conducted to document Rule 1003.e. compliance

FINAL RECLAMATION

☐ Final Reclamation will commence approximately _____

Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

COMMENTS:

To mitigate elevated bradenhead pressure, BCEOC proposes the following initial mitigation actions:

1. An initial pressure check will be conducted to verify current bradenhead pressure following the previous bradenhead test. If the bradenhead pressure is at or below 25 PSI, the bradenhead pressure will be deemed mitigated by previous blowdowns and will be re-evaluated during the subsequent annual test. If bradenhead pressure remains above 25 psi, option 2 will be implemented.
2. An additional 30 minute well blowdown will be performed to establish a trend on blowdown results (when compared to the previous test results). Initial and 30 minute instantaneous pressures will be recorded during blowdown. Following the blowdown event, Bonanza Creek will return after 14 days to record the bradenhead pressure. If the bradenhead pressure is below 25 PSI, the well will be re-evaluated during the subsequent annual test. If bradenhead pressure remains above 25 PSI after the blowdown event or continues to build above 25 PSI after 14 days, BCEOC will evaluate the pressure timeline data collected to date and prepare an extended mitigation plan. BCEOC will then submit a subsequent Form 4 detailing a plan for extended bradenhead pressure mitigation.
