Comment:

It appears from aerials that site was a Drive through Location; with footprint on North and South side of lease road. Vegetation on North side of Lease Road appears well established, though heavily grazed. Area South of road shows heavy animal impact where water has pooled, degrading uniform establishment of vegetation.

South of road is where Unknown Riser (Related?) is positioned. Needs to be determined if Riser, in line with pipeline, and having No guards to protect from Livestock, was to service PA Well.

The Four Pits, shown as Related to Location do not have Closed Status. One Pit, #100090 shows on COGCC Maps as "Status Unknown".

Corrective Action:

There are Three CAs and one Recommendation in this Section.

1) Contact Western Integrity Inspector, Richard Murray per identity of Unknown Riser (related facility) by 1/6/20.

2) Contact Northwest EPS Inspector Kris Neidel per Status of Four Pits, listed as Related to Location by 1/6/20.

3) If it is determined that Riser, is related and no longer needed; Abandon Per COGCC Rules & repair /re-vegetate any disturbance created by removal by 6/15/20.

Recommended to Assess vegetation in Southern area of site, applying remedies as indicated where desirable vegetation is not progressing.

Date **01/06/2020**

Overall Final Reclamation
