OIL AND GAS CONSERVATION COMMISSION
OF THE STATE OF COLORADO

OCT 14 1958
OIL & GAS
CONSERVATION COMMISSION

SUNDRY NOTICES AND REPORTS ON WELLS

INSTRUCTIONS

Notice must be given to the Director, and approval obtained in advance of the time when the owner or operator expects to recomplate or abandon a well or to change plans. Within thirty (30) days after recompletion, change of plans, or remedial work, a detailed report of the work done and the results obtained shall be submitted on this form in duplicate for wells on Patented and Federal lands, and in triplicate for wells on State lands. In work that affects only rods, pumps or tubing or other routine work such as, but not limited to, cleaning out to previous total depth, no report is necessary.

LEASE NAME _____ STATE _____ WELL NO. A-2

FIELD Walker WILDCAT _____ COUNTY Logan

LOCATION NW SW SW Section 16 Township 9N Range 53W Meridian 6PM
 (Quarter Quarter)
990 feet from South Section Line and 330 feet from West Section Line
 N or S E or W

(DETAILS OF WORK)

This well completed in February 1953 as a "J" sand producer with initial production of 56 barrels oil and no water per day. Production declined to below economic limit and well was recompleted in upper section of "J" sand with a high water-oil ratio and 500 MCF gas per day. Oil production was nil after three months and by July of 1958 the gas production dropped to 2538 MCF gas per month which is below the economic limit of 3120 MCF per month. Since there is no other prospective pay zone it is proposed to plug and abandon by setting a rock and cement bridge above perforations, shoot off and pull casing, fill hole with heavy mud with a cement plug in the bottom and in the top of surface casing, erect dry hole marker, level and abandon location.
