## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

In accordance with COGCC Rule 905.b, a confirmation sample will be collected from below the where the partially buried produced water vessel was formerly located prior to well/battery abandonment activities.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

One soil sample will be collected from the center of the former produced water tank location in accordance with Rule 905 b. The soil bore will be advanced using a hand auger to a depth of approximately 5 feet below ground surface. The tank was buried to a depth of approximately 3 feet below ground surface. The soil sample will be submitted for laboratory analysis of BTEX, GRO, DRO, pH, SAR, and EC. A site figure with the proposed sample location is provided as an attachment to this Form 27.

### Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Groundwater is not expected to be present at 5' bgs.

### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):
