INITIAL ACTION SUMMARY

Description of initial action or emergency response measures taken to abate, investigate, and/or remediate impacts associated with E&P Waste.

KPK is requesting to remove the production pit from the WAGNER #1 DNR Tank Battery. The tank battery is planned to be removed. The pit will be permanently closed per Rule 905.b.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Five (5) discrete soil samples will be collected from the base of the produced water vessel (~4 ft below ground surface) to verify soil was not impacted from the operation of the pit. Analysis for grab samples included TPH (DRO & GRO), BTEX, pH, EC, and SAR. See attached site map for partially buried vessel location and proposed sampling locations.

Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

If groundwater is encountered during pit removal activities, a minimum of one grab sample will be collected as soon as practical following removal of the pit and submitted for laboratory analysis of BTEX.

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):
